  - All KeyInfo elements now available
  - Various bug fixes
- (BL)

## 2. Version C++ 0.20 (May 2003)

- Windows Crypto API interface
  - Basic functions to extract information from signature objects
  - Various bug fixes
- (BL)

## 3. Version Java 1.0.5 (unreleased)

- Ported the docs to Forrest
- (KW)

## 4. Version C++ 0.10 (unreleased)

- First release of a Beta for the C++ library.
- (BL)

## 5. Version Java 1.0.4 (15 July 2002)

- Java - People who did not install Xalan properly under JDK 1.4.0 now get a more specific error message.  
(CGP)
- Java - We use the most recent version of the BouncyCastle JCE now.  
(CGP)

## 6. Version Java 1.0.3 (unknown)

- Java - Added support [Exclusive XML Canonicalization Version 1.0, W3C Recommendation 18 July 2002](#) . (There is no interop to test vector [Y4](#) because of a problem in Xalan)

Canonicalization is written completely new: it's about 5-80 times faster than the implementation in version 1.0.2. It's highly recommended to upgrade to the new version.  
(CGP)

- Java - Added support for [XML-Signature XPath Filter 2.0, W3C Candidate Recommendation 18 July 2002](#)
